PROFESSIONAL SUMMARY

The thread connecting restaurant operations, supply chain management, and software development is a consistent drive to solve complex operational problems through systematic thinking and purpose-built tools. Each career step has been a further distillation of that idea: systems and strategy transformed me from a cook into a professional chef, from a PO pusher into a supply chain specialist building custom data tools, and finally into a developer of software solutions. I bring deep operational experience, strong analytical instincts, and hands-on technical capability to roles requiring someone who can translate business needs into working systems. Currently pursuing an M.S. in Software Engineering while building production applications.

TECHNICAL SKILLS

Solution Design & Analysis: Requirements gathering, stakeholder interviews, process mapping, gap analysis, technical roadmapping, build-vs-buy evaluation, workflow optimization

Development: JavaScript/TypeScript, Python, React, Next.js, FastAPI, Node.js, SQL, REST APIs, ETL pipelines, VBA

Data & Analytics: PostgreSQL, SQLite, Power BI, Power Query, Power Pivot, Excel (advanced), data modeling, dashboard design, automated reporting

Infrastructure & Tools: Docker, Linux, Git/GitHub, GitHub Actions, CI/CD, JDE/AS400, Figma, Jira, Notion

AI/ML Integration: LLM-assisted development workflows, MCP server configuration, RAG implementations, prompt engineering

Business Operations: Supply chain planning, procurement, vendor management, P&L analysis, Lean/Six Sigma, Kaizen facilitation, change management

---

PROFESSIONAL EXPERIENCE

Independent Technical Consultant | Freelance
August 2025 — Present

Building production applications and pursuing freelance consulting alongside M.S. coursework in Software Engineering.

- Building automated Power BI dashboards and Power Automate flows for a manufacturing client, replacing a manual daily reporting process with a fully automated pipeline from email ingestion through SharePoint to scheduled dataset refresh
- Designed and deployed a full-stack NFL analytics dashboard (Next.js, FastAPI, PostgreSQL, Recharts) with automated data pipeline — live at crud.russellbomer.com
- Built a Small Business Financial Command Center in Excel/VBA and Power BI featuring KPI dashboards, budget analysis, anomaly detection, and rolling forecast models — listed on Gumroad, interactive demo at russellbomer.com
- Developing a custom content and analytics platform (Next.js, Supabase, TypeScript) for an independent sports media operation, designed as a proving ground for a broader creator platform product
- Built and maintain professional portfolio site (russellbomer.com) using Next.js, Tailwind CSS, and Framer Motion

Consulting Engagement — Operations & Technology | Main Street Restaurants Group
Gastonia, NC | March 2025 — September 2025

Engaged by a three-location restaurant group (~$5M revenue) to diagnose operational inefficiencies and implement technology solutions for cost control, inventory, and business intelligence.

- Led full consulting cycle: stakeholder interviews, phased project proposals, scoping, and delivery
- Built automated reporting and cost analysis tools, reducing manual effort by approximately 40%
- Designed dynamic food costing models enabling real-time margin visibility across all three locations
- Delivered aggregate food cost reductions of ~8% across the group, with 11% at the lowest-performing location
- Provided executive-level data visualizations and recommendations for ~25 end users across management and ownership

Supply Chain Coordinator / Materials Planner | DOLE PLC (Fresh Vegetables Division)

Bessemer City, NC | June 2022 — October 2024

Managed materials planning for ~50 SKUs of ready-to-eat salad products across major private-label contracts (Walmart, Dollar General, Aldi) for the U.S. East Coast. Coordinated with 25+ suppliers and 100–150+ stakeholders across procurement, FSQA, shipping, and transportation. Participated in food safety and financial auditing processes for publicly traded company compliance.

- Built Power BI dashboards for yield, waste, throughput, and downtime metrics consumed by plant management and executive leadership
- Architected ETL solutions via Power Query integrating JDE/AS400 ERP, internal databases, and operational systems into unified reporting
- Developed custom Excel/VBA planning tools with conditional logic for demand forecasting, order quantities, and yield-adjusted projections
- Co-led year-long Kaizen initiative: ~30 percentage point yield improvement on key ingredients, ~25% throughput increase (22–24 to 30 bowls/min)
- Automated monthly reporting processes, reducing preparation time by approximately 25% while improving data accuracy
- Minimized surplus liability by $135K during product discontinuation through strategic materials planning
- Produced process documentation and system walkthroughs adopted as training materials for five successors

Procurement Manager | Grand Bohemian Hotel Charlotte (Kessler Collection)

Charlotte, NC | August 2020 — June 2022

Managed procurement for a luxury hotel within the Kessler Collection portfolio, processing $50K+ in weekly POs. Led enterprise software implementation spanning multiple properties.

- Spearheaded year-long BirchStreet ERP/P2P rollout for ~65 users across two properties, leading training and coordinating with vendor-provided trainers
- Coordinated cross-property master data alignment and procurement standards across property-level, corporate-level, and GPO-contracted item hierarchies
- Built custom Excel solution integrating real-time ERP data for dynamic banquet pricing and event cost estimation
- Utilized Power Query and advanced analytics to monitor spend patterns and identify cost optimization opportunities
- Created operational documentation and process guides; mentored and trained successor through structured month-long transition

EDUCATION

M.S., Software Engineering | Western Governors University | 2025 — In Progress (30% complete, 9 of 30 credits; expected completion by August 2027 or earlier via self-paced curriculum)

B.S., Business Administration | Appalachian State University | Supply Chain Management concentration, Sustainable Development minor | 2022 — 2024 | 3.5 GPA

A.S., Business Administration; A.A., Culinary Arts | Central Piedmont Community College | 2018 — 2020 | 3.75 GPA

CERTIFICATIONS

Google Project Management Professional Certificate | NCSU IES: Lean 100–300 Series (Lean/Six Sigma Methodology) | Microsoft Office Specialist: Excel Associate | NC BioNetwork: HACCP (Hazard Analysis Critical Control Points)

PROJECTS

NFL Analytics Dashboard — Full-stack sports analytics application (Next.js, FastAPI, PostgreSQL, Recharts) with automated nflverse data pipeline. Deployed on Vercel and Render. Live at crud.russellbomer.com.

Portfolio Site — Professional portfolio built with Next.js, Tailwind CSS, and Framer Motion. Hosted on Vercel with custom domain routing. Live at russellbomer.com.

Homelab Infrastructure — Self-hosted Docker-based infrastructure: media library management, personal cloud storage, Home Assistant automation, mergerfs/SnapRAID storage pooling.

AI-Augmented Dev Environment — Custom MCP server integrating agent profiles, webhooks, guardrails, and automated workflows into VS Code for LLM-assisted development.
